A unique collection of curtain poles and finials, hand made from wrought iron. Available with a range of finials designed for traditional interiors.

Traditional hand forging produces: fine quality finials, elegant hand made scrolls, brackets with hammered back plates and hand twisted rings.

Straight poles

Are made to fit your window. A wide choice of brackets meets most fixing requirements. Intermediate brackets and passing rings cater for long straight poles, giving support without restricting the movement of curtains. For poles over three metres we can join pole lengths so that rings can pass the joint. There is no maximum length for straight poles.

Bay window poles

Passing rings and intermediate brackets offer an ideal solution for bay windows. Corners are well supported, but a single pair of curtains pulls around the bay. Traditional bay poles are made-to-measure with bends made to fit your window. Just complete a bay window measure form and we'll provide a ready to fit solution.
